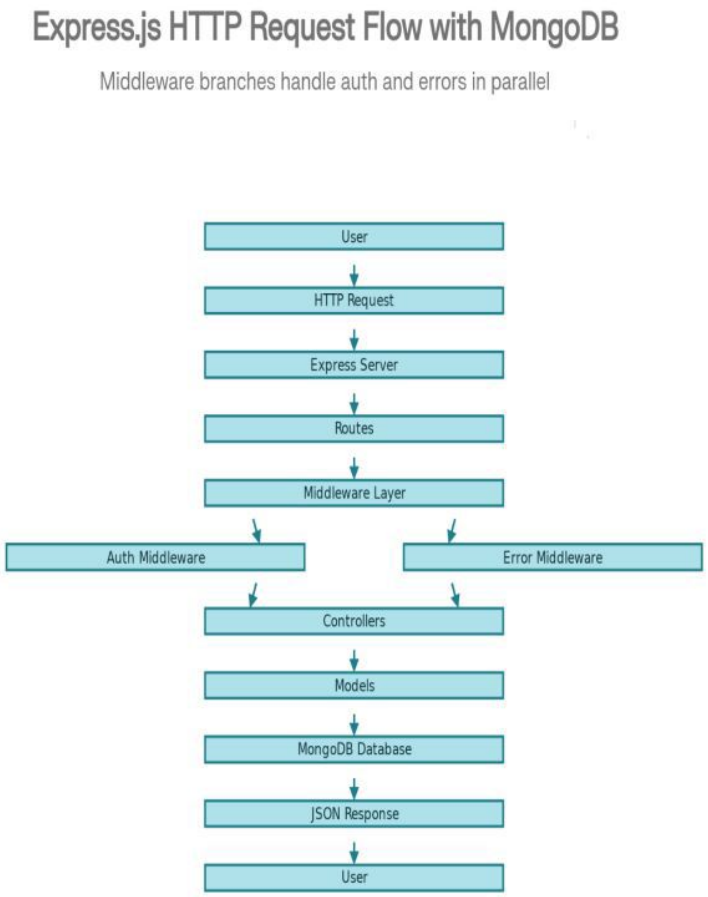
Project Design Phase-II
Data Flow Diagram & User Stories

Date	16 Feb 2026
Team ID	SWTID-2026-8203
Project Name	MicroGoal
Maximum Marks	4 Marks

Data Flow Diagrams:



User Stories – MicroGoals Backend API:-

User Type	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	USN-1	As a user, I want to register an account so that I can access the system.	The user data is stored in the database and a success response is returned.	High	Sprint-1
Customer (Web User)	USN-2	As a user, I want to log in securely so that I can access my personal goals.	A valid email and password generate a JWT token and return status 200.	High	Sprint-1
Customer (Web User)	USN-3	As a user, I want to create a new goal so that I can manage my tasks.	The goal is saved in the database and a 201 status code is returned.	High	Sprint-1

Customer (Web User)	USN-4	As a user, I want to view my goals so that I can track my progress.	Only authenticated users can access their own goals.	High	Sprint-1
Customer (Web User)	USN-5	As a user, I want to update my existing goal so that I can modify my tasks.	The updated goal reflects correctly in the database.	High	Sprint-1
Customer (Web User)	USN-6	As a user, I want to delete a goal so that I can remove completed or unnecessary tasks.	The goal is permanently deleted and a success response is returned.	High	Sprint-1
Customer (Web User)	USN-7	As a user, I want my data to be protected so that other users cannot access my goals.	Unauthorized access returns a 401 Unauthorized error.	High	Sprint-1

Developer / Admin	USN-8	As a developer, I want to test API endpoints to ensure they work correctly.	All endpoints return correct responses and status codes in Thunder Client.	Medium	Sprint-2
Developer	USN-9	As a developer, I want centralized error handling so that errors are managed efficiently.	Errors are handled through middleware and proper messages are returned.	Medium	Sprint-2
