Project Design Phase-II
Technology Stack (Architecture & Stack)

Date	16 Feb 2026
Team ID	SWTID-2026-8203
Project Name	MicroGoal
Maximum Marks	4 Marks

Technical Architecture:-

Table 1:-

S.No	Component	Description	Technology
1	User Interface	API testing interface for sending requests	Thunder Client
2	Application Logic-1	User authentication and account management	Node.js + Express.js
3	Application Logic-2	Goal CRUD operations and data processing	Node.js + Express.js
4	Authentication Layer	Token generation and verification	JSON Web Token (JWT)
5	Database Layer	Store users and goals data	MongoDB + Mongoose
6	Middleware Layer	Route protection and centralized error handling	Express Middleware

Table 2:-

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	Backend development framework	Node.js, Express.js
2	Database	NoSQL database for storing structured data	MongoDB
3	Security	Secure API access using token-based authentication	JWT
4	API Communication	RESTful API using HTTP methods (GET, POST, PUT, DELETE)	Express.js
5	Scalable Architecture	Modular MVC structure for future expansion	MVC Pattern
6	API Testing	Endpoint validation and debugging	Thunder Client
